## PROFESSIONAL SUMMARY

I'm a young professional who's been working in the technology field as a developer for the last one year, working with a diverse group of individuals on various technological fields, primarily in a e-finance sector. I'm looking for a new opportunity to further grow and align my technological skills and experience with my management and communication skills, and be involved in larger responsibilities that reach out to a greater organizational impact.

---

## EXPERIENCE

### APPLICATION DEVELOPER

*Rakuten Bank / Tokyo, Japan / October 2018 -*

I was part of the backend (Java/Weblogic) and backend renewal team (Openshift/Jboss/Docker). My work included development on projects related to the existing backend system, as well as developing the new backend system. In addition to this, I was also managing a small team that developed new services and designed operational updates for the backend renewal project.

---

## PROJECTS

### VOLUNTEERING WITH ENACTUS

Was involved in on-site NGO visits every week in the slums of Shivaji Nagar, Govandi, Mumbai. Taught English and sewing to the children of sex workers, and sometimes the sex workers themselves as part of a larger effort to empower these women into self-sufficiency.

After graduation, I am still involved with current team and help with mentoring and budgeting, in addition to maintaining and updating the tools that we created (AR education, emergency mobile app) whenever required.

---

## EDUCATION

### BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

*NMIMS University / Mumbai, India / 2018 / 3.6 GPA*

---

## SKILLS

JAVA / OPENSIFT / DOCKER / WEBLOGIC / NODE.JS / PYTHON / COMMUNICATION / LEADERSHIP
